EDUCATION

BS (CS)

Khwaja Fareed University of Engineering & Information Technology (KFUEIT), RYK

2019-2023

ICS

Khwaja Fareed College, RYK

2017-2019

SKILLS

- HTML
- CSS (& Bootstrap)
- JavaScript
- React
- Git and GitHub
- Node.js & Express.js
- MongoDB & Mongoose

ABOUT ME

Hi, I'm a coding enthusiast with expertise in MERN stack. I started by learning HTML, CSS, and JavaScript and then moved to React. I eventually moved to backend and learned Express.js and Node.js MongoDB (with Mongoose). I also made projects along the way to practice my skills.

These days, I'm seeking web development internships to further put my web development skills into practice.

PROJECTS

React & Node.js (MERN Stack)

R App

It made this app to let me keep track of my daily tasks, goals, journals, etc. It also has a notes feature to let the user add and save notes.

React & Node.js (MERN Stack)

Flavor Finders

This is a recipe posting and finder app that lets users add as well as browser recipes.

HTML, CSS, JavaScript

Bus Information Program

I noticed that there was no system for providing information regarding bus timings at my university. So, I thought of creating an app that would provide detailed bus timing information based on the route and route time selected by the user.

HTML, CSS, JavaScript

To-Do List App

While learning JavaScript, I decided to make some apps along the way to put my knowledge into practice. This is one of them. It lets you add tasks to your to-do list, check them off as you complete them, as well as remove them as needed.
